RAISEup Texas works to achieve whole school transformation to increase the success of students, teachers, and leaders in schools across Central Texas. Foundational to the RAISEup Texas model is the expectation that all campuses will identify struggling readers and provide effective support for these students to increase their ability to read in all demands and contexts. During this session, you will experience the blend of Learning Strategies, Content Enhancement Routines and the latest literacy best practices as a middle school student in a reading intervention setting. See what teachers have accomplished to make literacy instruction meaningful and effective for our students, incorporating what works for secondary students while continuing to use the Learning Strategies with fidelity.

Presenter: Amy Havard
