Wish you could get teachers to implement Content Enhancement intentionally and routinely? Come learn about a new differentiated approach to Content Enhancement PD that has been piloted by Dr. Keith Lenz and the Florida SPDG SIM Project. This approach is designed to promote use of Content Enhancement Routines as a foundational practice, deepening implementation throughout a whole course. This is achieved by starting teachers with the Course Organizer and SMARTER planning then leveraging individual teacher choice on PD for additional routines resulting in increased diversity and frequency of routines employed. Also incorporated is the shift to use of Cue-Do-Review across all learning activities. Hear feedback from those involved, the positive changes made in classroom practice as well as the resulting student outcomes. Critical elements for success of this approach and its potential for sustaining implementation will also be discussed.

Presenter: Janice Creneti
Co-Presenters: Keith Lenz and Cindy Medici
