Micro-credentialing is a relatively new term and way of doing business in the field of education. This process allows educators the opportunity to identify, prioritize, and customize their professional learning needs. How can we promote and support micro-credentialing as SIM Professional Developers in order to share the instructional power of SIM Learning Strategies? During this poster session, we will discuss the benefits of micro-credentialing and how we can help teachers broaden their skills and knowledge of SIM Learning Strategies through the micro-credentialing process.

Presenter: Dana McCaleb
